

U2 LT5 Group Practice*LT 5: SWBAT solve multi-step equations by combining like terms and distribution.*

1. $3(x + 1) = 18$

2. $5(x - 2) = 30$

3. $6(x - 1) = 12$

4. $5x + 8 - 3x = 22$

5. $4x + 8 + 6x = 38$

6. $4(x - 5) + 8 = 52$

7. $7(x + 17) - 6 = 36$

8. $3(4x + 1) - 3x = 84$

9. $5x + 8x - 2 = 24$

10. $-5(x - 7) = 90$

11. $2(4x - 1) + 1 = 15$

12. $3(2x + 4) + 4x = 72$
